

EARLY INVESTIGATOR HIGH SCHOOL RESEARCH INTERNSHIP PROGRAM

REAL WORLD SCIENCE TAUGHT IN A REAL LAB

- Step into the shoes of a stem cell researcher
- Learn the science behind stem cell research and regenerative medicine
- Gain marketable biomedical lab skills

PROGRAM HIGHLIGHTS

Real-world biomedical training program focusing on molecular cell biology, stem cell science and regenerative medicine

Aimed at students who are serious about pursuing a career in science or medicine

Students participate in original research in the laboratory of an internationally renowned stem cell scientist, learning a wide range of sophisticated and highly sought after lab skills

Curriculum features a 5-day techniques training course, college style educational forums, career development classes, science colloquium, poster presentation and graduation

Strengthens college applications for premedical and science degree programs - improves confidence and interpersonal skills

DETAILS

DURATION: 8 WEEKS | MONDAY - FRIDAY | 10.00AM-4.00PM | 240 HRS
LOCATION: LAB LAUNCH MONROVIA AND HOST LABORATORY
DATES: JUNE 11TH - AUGUST 3RD
TUITION: \$10,000
